ABOUT THE COMPANY

Rypinckie Zakłady Metalowe Ltd. has been engaged in the production of metal construction elements for several decades. The company's history dates back to the 1940s, when the then Rypinckie Zakłady Okretowe was part of the United Shipbuilding Industry. In 2002, Rypinckie Zakłady Metalowe Ltd. is established and production of specialized steel flanges for pipe connections begins.

15 percent of production goes to the Polish market, while 85 percent is exported. The main customers are European Union countries - the Netherlands, Belgium, Germany and Finland. We also cooperate with customers outside the EU.

The company has an ISO 9001:2015 quality management system and is authorized to manufacture materials for pressure equipment in accordance with the Pressure Equipment Directive PED 2014/68/EU. The quality management system is designed to meet the high technical requirements of customers. The process is subject to detailed control at each stage of production.

OFFER

Elements produced by Rypinckie Zakłady Metalowe Ltd. are used in the construction, shipbuilding, automotive, chemical industries and wherever steel flanges find their application.

The main products are flanges for pipe connections made of carbon steel (S235JR, S355J2, P265GH, P355NH/NL1) and acid-resistant steel (1.4404, 1.4541, 1.4301/07), manufactured according to Polish and international standards (DIN, ANSI, SFS, NS, JIS).

Qualified personnel are able to prepare technical drawings and make unusual and complex elements to individual order.

Services offered:

- Plasma-gas cutting;
- CNC machining: – phrasing,
– cutting,
– turning,
– drilling.

TYPES OF STEEL FLANGES AND THEIR USE:

Neck flanges

Products with a characteristic elongated neck shape, properly matched to the diameter of the pipe and welded to it. They will work well for heating, water, refrigeration and chemical installations, among others.

Flat welding flanges

One of the basic types of flanges. It is mainly used for pipelines in water and ventilation systems, bulk material transport and other tasks.

Blind flanges

Flanges closing pipes from one side in various types of technological installations.

Loose flanges

Rotating parts of the pipeline. Flanges slipped on the pipe and protected from slipping by welded rings.

Also on offer:

- oval flanges;
- flanges of unusual shapes;
- threaded flanges;
- other items according to customer demand.

When making an inquiry, please specify the type of product, standard, size, quantity and expected lead time. For non-standard products, please send a drawing and provide additional requirements.
